BURNS COTTAGE THREATENED.

Fire at Alloway, Scotland, Barely Missed the Poet's Birthplace.

John W. Dick, president of the Burns ottage Association, has received from Robert Dick of Glasgow advices to the effect that the famous little cottage at Alloway was threatened with destruction by fire July 24. The Glasgow Herald thus described the incident:

described the incident:

A destructive fire occurred yesterday morning in the rows of thatched cottages at Alloway, situated on the side of the road almost immediately opposite burns's cottage. The fire broke out shortly before 3 o'clock and soon enveloped the four houses in the row Fortunately for the safety of the poet's birthplace the wind was blowing the flames and sparks in a southeasterly direction, and away from the cottage, but the imminence of the danger occasioned not a little alarm.

The row of cottages destroyed was the property of Mr. George Coats of Belleisle. They were originally slated, but in order to harmonize them with their surroundings Mr. Coats had them thatched over the slates. An odd circumstance is that when the fire was discovered an old thatcher was busy repairing the thatch on the opposite side of the house. The damage is estimated at 1709 or 1800. It is supposed that the fire was caused by a spark from a chimney igniting the thatch, which was in a very dry condition.

The petition states that a lamp fell on Schindler's head while in his berth, inflicting a severe scalp wound and causing concussion of the brain. On arriving at St. Louis, about March 3, he was confined in the hospital for ten days as a result of the accident. He says since then he has been unable to do any work and has lost \$2,000 in salary.

## CARMACK REPLIES TO REPUBLICAN LEADERS

Holds Their Campaign Textbook Up to Ridicule Because of Its Pretensions to Candor.

Tennessee Senator Refers to Administration Party's Deceptive Attitude on Great Issues of the Day.

14th St. and Pennsylvania Ave. Washington, Aug. 4.-Taking for his text the Republican textbook just issued, Senator Carmack of Tennessee, chairman of the Literature Committee of the Democratic Campaign Committee, said to-day;

"The first paragraph of the book seems to be given in the nature of a text for the whole. It reads:

"'You don't have to guess what the Republican party will do. The whole world knows its purposes. It has embodied them direction. in law and executed them in administration," President McKinley's definition of the Republican party before he was elected Presinot the whole world, is beginning to know has reached the public. the purposes of the Republican party, istration. The world may have known what the purposes of the Republican party were, but the Republican party certainly never intended that the people should know. "The same is true of its record on reci-

procity. If Mr. McKinley were living today he would probably confess that he himself was mistaken as to the purposes of the Republican party on this question.

"Perhaps the world knows what the Re-publican party intends to do on the tariff and trust question. It probably knows that it has no thought of passing Mr. Babcock's tariff bill or Mr. Littlefield's antitrust bill. But I am very sure that the managers of

No Philippine Policy at All. "Does the wholeworld or do the American people know what are the purposes of the Republican party in the Philippine Islands? The party leaders evidently think so, and they, therefore, consider it unnecessary to make any public statement on the question. It has emphatically declined to say whether it intends to hold the Philippines permanently as a vassal province; whether it intends to incorporate them into the union, or whether it intends at some time or other to give them freedom and independence.

"You will find among the party leaders and supporters of the administration men like Spooner, who think that a colonial policy would entail vast burdens and dan-Beveridge, who think it is our destiny and duty to go forth conquering and to conquer; men like the President, who like this kind of thing because it is warlike; men like Secretary Shaw, who think there is money in the business of seizing territory and killing the inhabitants; other men who think we ought to get out of the Philip pines, but con't know how to do it; in fact, all shades and varieties of opinion. You might take a dozen Republican Senators at random, and no statement of the purpose of the Republican party in the Philippines could be written that could command a majority of their votes.

"If the people of the United States are to look into the legislative record of the Republican party for the future indication of what may be expected of it, where will they look and what will they find?-nothing consistent in any line."

SKULL CRUSHED WITH A ROCK Probable Fatal Quarrel at Mans field, Mo.

Forest's recovery is considered highly improbable. The trouble seems to have come up over Randolph hauling some goods for Forest after having been ordered not to do so. Randolph carries the mail from Niangua, a Frisco station, to Grove Springs, and also conducts a freight and traffic business. There was only one eye-witness to the encounter, a Mr. Dalk, and from the best information obtainable it appears that Randolph was advancing toward Forest with a stick or club when Forest fired one shot at him. Randolph then picked up a rock and struck Forest.

ever, from those first granted. The petitions this time, instead of alleging spiracy to corner July oats, state that the margins can be paid only by the illegal use of an authority inequitable and unjust. Ten of the injunctions issued to-day were at the complaint of Pratt & Buckley, another board firm. These latter injunctions are against individual board firms to pre vent them from collecting margins. The amount of money involved in the Waitegers upon the United States; men like Thorburn case is about \$40,000. In the others about twice that sum.

Roach Brothers Supposed Each Other Dead, Though Living Only Ten Miles Apart.

ARRAIGNED FOR INSINCERITY. ALL EUROPE IS INTERESTED. HAVE A JOYOUS CELEBRATION.

Through the Miscarriage of a Letter, a Family Is Separated for More Than Fifty Years.

REPUBLIC SPECIAL.

Excelsior Springs, Mo., Aug. 4.-A reunion of the Roach family here yesterstories on record. It involves the reunitbeen seperated for half a century, a part of which time they had been living almost within a stone's throw of each other, each branch supposing the other dead.

More than fifty years ago John Roach and his two sons, George and Lewis, left their home in Illinois to ge West to search for gold in the fields of California. liam Roach, another son, was left at home to take care of his mother. The father and his two sons drove out to California in covered wagons after the style of "prairie schooners." As they drove away that day they probably little dreamed what tragic incidents were in store for them, but as life goes a full crop of surprises awaited them. WAITED FOR LETTER

THAT NEVER CAME. It was the intention of the father to write for Mrs. Reach and his son as soon as they were settled in California. In vain the wife waited for a letter which never came. Two years elapsed and not a line was received from the prospecting party. Shortly after that came a report that the father and sons had been slain by the Indians, who infested the Western country and terrorized the people by their deeds of cruelty.

Time seemed to confirm the report, as no trace of the three men could be found during the long period which followed. Several years ago William Roach left his mother with friends in Illinois and came out to Missouri to live, settling on a farm

near Excelsior Springs two years ago. A short time ago he received the first intimation that his lost relatives were alive. W. B. Arnold of Excelsior Springs, who recently moved here from Kearney, Mo., and commented on the marked similarity in appearance. Though firmly of the belief that his brothers were long since dead. Roach to Kearney-ten miles distant-on

one of his business trips there. The next time Arnold went to Kearney he chanced to meet George and Lewis Roach. He told them of the William Roach at Excelsior Springs, and they remarked that it was quite co-incidental because they lost a brother by that name in Illinois several years before.

THREE BROTHERS HAVE A JOYOUS REUNION.

On Arnold's next trip to Kearney he took William Rosch with him. The three Roaches met. A glance at each other convinced the brothers that they had found each other. It required but a brief exchange of notice to plain how the mistake had occurred-a letter had been miscarried. There was an affectionate scene. It developed that the fither had died in California and the sons several years ago came back East to farm. They settled near Kearney without ever thinking to make an investigation, for they supposed their mother and brother dead. Thus for two years they had lived within

Negotiations Opened in Washington to Bring About Mutual Explanations and Apologies.

Washington, Aug. 4.-Negotiations have een opened in Washington for the establishment of an entente condiale between the Governments of Nicaragua and Colom bia. Ministers Concha of Colombia and Corea of Nicaragua are carrying on the

negotiations. The move grows out of the suspicion with which these two countries have viewed each other of late. Colombia has asserted that Nicaragua is responsible for much of the trouble on the Isthmus of Panama. that expeditions have formed on Nicara guan soil, and that the Nicaraguan port of Corinto is the base of military operations against Colombia.

against Colombia.

It is strongly intimated that Colombia will adopt countersteps by an invasion of Nicaraguan soil.

Now, however, there are good prospects that the negotiations opened in Washington will lead to mutual explanations and apotogies and to an agreement by which each will rigidly respect the laws of neutrality at d the rights of the other.

No Definite Arrangements Made for Structure at Broadway and Chestaut.

Company, one of the interested parties being Edwards Whitaker.

Mr. Whitaker stated yesterday that while improvements doubtless will be made eventually, no definite plans have yet been framed. It has been known for a year or more that that owners of the property seek to interest certain railroads with a proposition to put up a structure especially adapted to railway uses, the location being considered particularly suitable.

The latest report is that the Frisco may decide to lease the proposed building. The fact of this system's purchase of the Chicago and Eastern hilmois road has strengthened the rumor. Mr. Whitaker says, however, that he knows of no deal with the Frisco. That road moved into new quarters in the Commercial building only a few months ago under a five-year lease.
